## **Project Proposal 2: Sparkle Clean Commercial & Residential Cleaning Services**

### **2.1. Organisation Overview**

Name: Sparkle Clean Commercial & Residential Cleaning Services

Brief History: Founded in 2020 in Johannesburg, Sparkle Clean started as a residential maid service and grew into a full-scale cleaning company offering corporate office sanitation, deep carpet cleaning, and post-construction cleanup across Gauteng.

Mission and Vision Statements:

Mission: To deliver thorough, reliable, and eco-friendly cleaning solutions that create healthier home and work environments.

Vision: To become Gauteng's leading provider of eco-conscious commercial and domestic cleaning solutions through superior service and seamless online booking.

Target Audience: Homeowners, estate managers, property developers, and corporate office managers looking for professional cleaning contracts.

### **2.2. Website Goals and Objectives**

Specific Goals:

Generate qualified commercial leads through an online quote request form.

Build trust by displaying certifications, client testimonials, and clear service descriptions.

Achieve 30 online quote inquiries per month within three months of site launch.

Key Performance Indicators (KPIs):

Quote request form completion rate.

Bounce rate on service pages.

Organic search engine ranking for local cleaning terms in Johannesburg.

### **2.3. Current Website Analysis**

Strengths: High customer retention through word-of-mouth recommendations and printed flyers.

Weaknesses: Absence of a professional digital footprint limits potential corporate contracts and larger commercial tenders.

Areas for Improvement: Create a corporate web presence with clear service checklists, client reviews, and instant quote inquiry features.

### **2.4. Proposed Website Features and Functionality**

According to Hoang(2025), features and functions of a cleaning service company contains the following :

Home Page (index.html): Professional header banner, headline overview, key statistics (e.g., houses cleaned, corporate clients), and quick contact form.

About Us Page (about.html): Company background, staff vetting/safety procedures, eco-friendly product policies, and certifications.

Services Page (services.html): Detailed breakdown of service packages: Deep Home Cleaning, Office Sanitation, Carpet & Upholstery Cleaning, and Move-In/Move-Out Cleaning.

Quote Request Page (quote.html): Interactive web form allowing prospective clients to select property size, required services, frequency, and request a personalized estimate.

Contact Us Page (contact.html): Address details, phone line, WhatsApp business button, interactive office location map, and direct contact form.

### **2.5. Design and User Experience**

Colour Scheme: Refreshing corporate palette featuring royal blue (#0056B3), clean cyan (#00A8E8), crisp white background (#FFFFFF), and light grey borders (#F0F4F8).

Typography: Professional modern sans-serif fonts (Aptos / Segoe UI) with clear weight hierarchy.

Layout and Design: Grid layout emphasizing cleanliness, ample whitespace, structured checklists, and high-contrast call-to-action buttons.

User Experience Considerations: Fast-loading assets, easy single-click phone calling links, intuitive quote submission workflow, and full mobile responsiveness.

## 2.6. Technical Requirements

Languages & Standards: Semantic HTML5 code, CSS3 styling sheets, and basic JavaScript form validation for user input checks.

Hosting & Domain: Standard web hosting account with a custom [.co.za](http://www.sparkleclean.co.za) domain (e.g., [www.sparkleclean.co.za](http://www.sparkleclean.co.za)).

Development Tools: Visual Studio Code environment utilizing Git and GitHub for web asset management.

### Timeline and Milestones

| Milestone                     | Target Completion Date | Deliverable Description                                           |
|-------------------------------|------------------------|-------------------------------------------------------------------|
| Phase 1: Project Initiation   | Week 2                 | Proposal submission, wireframe sign-off, and site structure       |
| Phase 2: HTML Development     | Week 4                 | Multi-page HTML layout creation and semantic content insertion    |
| Phase 3: CSS Styling          | Week 6                 | Application of brand stylesheet, grid layout, and styling         |
| Phase 4: Quote Form & Testing | Week 8                 | Form functionality integration, accessibility, and device testing |
| Phase 5: Deployment & Review  | Week 10                | Final project upload to repository and live host submission       |

### Budget

Domain registration : R 100 per year

Web hosting : R1 100 per year

Website design & development: R 5 000

Graphics assets : R 350

Maintenance: R2 000

Total Estimated budget = R 8 550
